WORK EXPERIENCE

GreenSight Technologies

Software Intern

San Luis Obispo, CA
December 2024 – Present

- Utilized **Jira** and **Confluence** to implement Agile methodologies improving communication during stand-up meetings and with the product manager ensuring team-alignment.
- Developed and implemented a CI/CD pipeline using **Expo** and **Github Actions** ensuring automated code testing, and beta users and developers would get the latest features on Testflight.
- Architected a relational database for Google's BigQuery in order to store and get accurate pricing for different electronic devices.
- Setup and wrote unit and end-to-end tests using **Jest** and **Detox** respectively that caught numerous bugs during ongoing development ensuring early bug detection and bug free code.

Team fEMR

Open Source Contributor

San Luis Obispo, CA
September 2024 – Present

- Utilized **Jira** and **Confluence** to implement Agile methodologies in an iterative environment where we communicate with the client, create requirements, and deliver small changes each iteration.
- Developed and enhanced an open-source electronic medical reader using **Java** and **Scala**, providing diagnosis assistance in low-resource settings.
- Developed a login system for Mac installers to ensure secure access and mitigate unauthorized installations.

Cal Poly

Systems Programming Teaching Assistant

San Luis Obispo, CA
March 2024 – August 2024

- Worked closely with students, offering feedback for upcoming and current assignments and solidified their understanding of key concepts of C, helping them finish their assignments.
- Facilitated a calm and collected testing environment providing immediate support for students, ensuring that problems are resolved and students can concentrate.
- Graded student's assignments, and identified areas of improvement enhancing students' skills and knowledge.

PROJECTS

Rizzlet

Software Developer

San Luis Obispo, CA
January 2024 – June 2024

- Developed a gamified study app with **React** enhancing student learning and making studying more enjoyable.
- Designed and implemented a non-relational database using **MongoDB** that efficiently stored user courses and flashcard data which enabled users and developers to reliably retrieve data.

EDUCATION

California Polytechnic State University, San Luis Obispo

B.S. Software Engineering

June 2026

GPA: 3.55

Relevant Coursework: Data Structures, Project Based Object-Oriented Programming, Systems Programming, Software Engineering I & II, Database Systems, Dynamic Web Development, Design and Analysis of Algorithms

SKILLS

Programming Languages: C, RISC-V, Python, Java, Javascript, Typescript, SQL

Frameworks and Technologies: Lit, React, React Native, Expo, SolidJS, HTML, CSS, Tailwind, Node, Express, Jest, Github, Git, Azure, Jira, Detox, Play, Scala, MongoDB
